

Making responsible investments work

Bridging the gap between global investors and local end users

1st December 10:00 - 11:30 AM

Session description

A recent IIED study on climate finance shows a big gap between total climate funds available and the proportion of that being implemented at local scale. In addition, global spending on conventional agriculture and forestry is manifold the spending on responsible land use practices. The CGIAR program on Forest Trees and Agroforestry studies success factors for inclusive and responsible businesses, which are at the core of both climate finance and responsible investments. It also looks at financial mechanisms that can adequately address the needs of such businesses. TBI and IUCN are implementing programs that should bring investors and small and medium (forest) enterprises in tropical landscapes closer together. Building on these experiences, FTA, TBI and IUCN brought together a panel that represents both investors and end-users, who will showcase their experiences with finance for inclusive and responsible land use practices. Through an interactive discussion with the audience the session will come to suggestions for priority actions that should lead to a greater contribution of finance to inclusive and responsible practices.

Speaker

Duncan Poore

Principle researcher, IIED

Panel members

Pieter van Midwoud

Senior plantation officer, Ecosia

Marthe Tollenaar

Environmental and social manager,
New Forests Asia (Singapore) Pte Ltd

Pauline Nantongo

Ecotrust

Tran Huu Nghi

Director Tropenbos Vietnam

Moderator

Bas Louman, Tropenbos International

Inclusive Finance and Business Pavilion
